

Installation instructions for ESXi 5.5 and 6.0

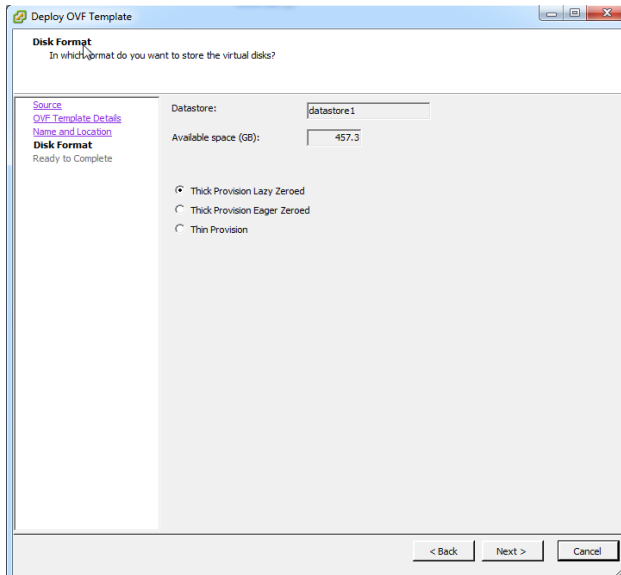

1. Go to file > Deploy OVF Template

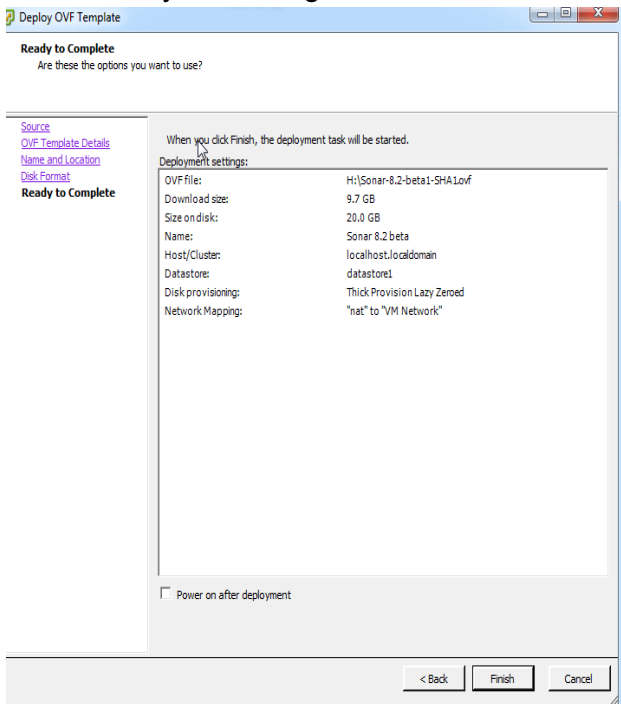

2. Select OVF file(s), (ignore the warning below).

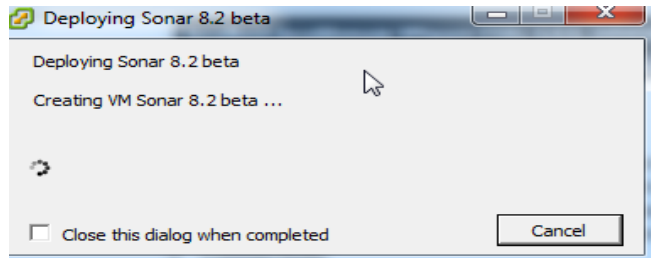

3. Use Thick Provision Lazy Zeroed and click Next.

4. Verify the settings and click Finish

5. "Deployment will start"

6. Power on the VM, and refer to the Readme-Sonar_VMware_OVF.pdf for IP configuration
